Hello:

With brush clearing underway, it's now even more visible the homeless encampment that has been set up in the valley just below Sister Else where Day and Pali meet. We had understood that you were working on this issue and given how high of a fire hazard this is and the risk that this homeless encampment poses that you were getting them out of there. Clearly, that's not the case. What is being done? What is the update on this threat to safety? We already have asked time and again about the update on the failed Sister Elsie road. Please let us know. We are trying to work with you and are being extremely patient, but you are leaving us with very few options but to escalate this further.

Please advise.
